The AI Travel Concierge

Phuket Partner Brief — what's live, how we earn, and how we scale

Try it right now

Scan → say hi on LINE → ask for anything

LINE @799pyrus

01 What NUM is

NUM is a personal AI travel concierge living inside the chat apps travelers already use. A guest adds **@799pyrus on LINE** (WhatsApp & WeChat next), says hi in any of 9+ languages, and asks for anything. NUM answers in seconds, recommends only **real, verified local businesses**, and arranges the booking in the same conversation. No app to download. Free for travelers, forever.

1 • Scan & add

QR on billboards, tuk-tuks, hotel desks & partner doors → LINE opens instantly

2 • Ask anything

"Best massage near me" · "seafood dinner tonight" · "boat to Phi Phi" — any language

3 • Booked

Verified partner confirms in-chat; guest pays the business directly, as always

The anti-OTA: free to join, free to be recommended, and a **10% fee only when a completed booking happens** — about half of what OTAs take. No subscription. Nothing owed on cancellations or no-shows.

02 What NUM does for Phuket

Travelers

A free concierge that never sleeps, in their language — plus scam protection, safety guidance, honest prices, and bookings without language barriers.

Local businesses

High-intent guests at the exact moment of decision. Bookings on their phone. Pay only on results. Demand analytics. A claimable profile instead of an OTA toll booth.

Drivers & locals

A second income — stars for every traveler referred, redeemable at partner businesses. The island's working people become NUM's sales force.

The island

Accurate, living business data. Visitors spread beyond the same five hotspots. A verification bar that rewards honest operators.

03 What is live today

AI concierge on LINE

Answers in the guest's language; deep Phuket knowledge — sights, beaches by vibe, food, prices, seasons, scams to avoid. Never a flat "no."

A brain per guest

Remembers area, dates, party, diet, budget & open requests — more useful every day. FORGET erases instantly; PDPA-aligned by design.

3,700+ verified directory

Google-rated; AI recommends only from it. Paid promotion can never change organic ranking — trust is the product.

Ground-truth engine

Guests earn stars reporting wrong info; field team verifies on-site with photos; HQ approves; the map self-heals.

Referral engine

Drivers & hotel staff carry personal QR cards, earning stars per traveler. Self-serve cards in 30 seconds at itsnum.com/referral.

Phone-first onboarding

itsnum.com/claim works entirely from a phone, in Thai — or type CLAIM on LINE. 16-language translate on every page; console in EN-ไทย.

Boats & water sports

Jet-ski, parasail, charters, transfers & tuk-tuks in 6 languages; pickup point + departure time collected; scam-proofing built in.

Affiliate product engine

Sunscreen, water, swimwear, SIMs → nearest partner shop + NUM promo code. Codes counted at the till; kickbacks invoiced monthly.

Operator console

36 live screens: ops, executive, sales, directory, HQ, field team, AI quality — plus the island map of signed vs unsigned businesses.

04 How we make money

1 • Booking success fee

the backbone

10% of completed bookings only. Whale tier 15–20% (yachts, villas, private tours — tickets 15,000–80,000฿+).

2 • Stars — paid visibility

growth engine

Businesses buy star packs (1★ = 1฿; 1,000–50,000฿ with volume bonuses) and spend on clearly-labeled promo products — see menu.

3 • Affiliate products

Promo-code kickbacks on what every tourist buys. Counted at the till, invoiced monthly — zero systems integration.

4 • Later

Merchant analytics (~990฿/mo) · booking-calendar SaaS · tourism-board partnerships.

Trust rule: paid placement never changes organic ranking, and every paid line is labeled. Guests trust NUM because recommendations can't be bought.

Promo product	What the guest sees	Draft price
★ Featured line	One labeled suggestion when guests ask for that category + area	900★/week
🎉 Event promotion	Surfaced on "what's on tonight / this weekend"	500★/event-wk
🔥 Promo of the day	The business's deal shown on matching asks	300★/day
🚀 New-listing boost	Two weeks Featured after claiming	1,500★ once
🛑 Rescue priority	First ping among equals on unmet-request rescues	200★/month

Regulatory design: guests & drivers only EARN stars, never buy. Purchased stars are business ad-credit spendable only on NUM services — a closed loop that stays outside Thailand's e-money licensing (100M฿ capital). No cash-out, no transfers, ever.

05 Go-to-market

First 100 businesses — a 30-day sprint

Two field pairs (closer + verifier/photographer), 3–4 onboardings/day each. 25-minute script ends with a live test booking + window QR.
Quotas: ≥30 restaurants · ≥15 spa · ≥15 boats & water sports · ≥10 tours · ≥5 transport.

Channels already flowing

153 businesses emailed (replies → info@5arz.com) · 501 phone-only call list · Patong (784 mapped) & Kata (581) walk territories · /claim funnel · LINE CLAIM keyword · driver referral cards.

Boats first — the flagship

Highest tickets & the booking guests most fear making blind — verification IS the pitch. Field team sights insurance + TAT licence, records pier & capacities. "Only on NUM": bioluminescent night kayaks, sunset longtails, private chefs on charters.

On-ground marketing — one CTA everywhere

The QR + LINE @799pyrus + "Your free AI travel guide · ไกด์ AI ฟรี". Placement #1: the **airport arrivals** → **taxi corridor billboard** — the highest-intent moment on the island. Then tuk-tuk wraps (drivers already earn our stars), beach-entrance QR signs doubling as red-flag safety info, window stickers on every partner door, guesthouse front-desk cards, "NUM-verified ✓" flags on partner boats.

Every placement carries its own tracking code — nothing is printed without one, so every baht of marketing is attributable.

06 How we scale

Central (5arz)

Platform · AI · brand · playbooks · data pipeline. Location-neutral by design — a new market is a field team plus a data run.

Local (Thai JV)

Merchant contracts · revenue collection · staff · compliance.
Proposed: NUM (Thailand) Co., Ltd. — three ownership routes prepared, incl. US–Thai Treaty of Amity.

Numbers we watch

Bookings/merchant/month · take per booking · star ARPU · field cost per verified merchant · merchant churn · affiliate revenue per 1,000 chats.

07 What we need from the Phuket team

- ☐ Walk territories + team roster for the first-100 sprint — and your read on promo-menu pricing
- ☐ JV shareholder plan + a bank able to onboard Omise/2C2P with PromptPay
- ☐ Your boat-operator list, and 10 launch affiliate shops (2 pharmacies, minimart, beachwear, SIM counter, sports shop)
- ☐ Local print vendor (cards, stickers, boat flags) + billboard/wrap placements with costs
- ☐ The dedicated WhatsApp SIM — the one open channel item
